

Process and requirements analysis

Our offer for
your business solution

Your challenge

- **Business:** Definition of your expectations and requirements for a business solution (ERP)
- **Technology:** Review of the technical framework conditions
- **Investment:** Estimation of the cost
 - Calculation of Return on Investment (ROI)
 - Total Cost of Ownership (TCO)

Our offer

Collection and analysis of the most important and critical business processes

Independent of a business/ERP solution

Support for the determination of the return on investment

Answer for the most frequently asked questions regarding an ERP project

Process and requirements analysis

Your profit

The result of the analysis ...

... is a valuable basis for assessment and pre-selection of ERP products and suppliers

... enables the comparability of offers for different systems and suppliers

... is the basis for a smooth introduction of ERP/business solution

... is the definition of the operational and technical requirements by neutral specialists

Effort

Analysis as a service

- Independent of NAV
- Neutral documentation as the result
- To the cost price (5 or 10 man days à € 700 per day including travel costs)

Analysis as part of the introduction of Microsoft Dynamics NAV

- Initial project phase
- Acceleration of the entire project, especially in later analysis phases
- Allowance for total project costs

Maximize the profit - Minimize the risks

Further decision accelerators 1-2

... for Microsoft Dynamics NAV

- **Fit-Gap-Analysis:** Determining and recording the matches and differences between Microsoft Dynamics NAV and your business processes
- **Proof of concept:** Evaluation of the solution by your team members with their own data in NAV
- **Architektur analysis:** Analysis of the existing architecture and determination of problem areas.

For faster, better decisions

Further decision accelerators 2-2

... for Microsoft Dynamics NAV

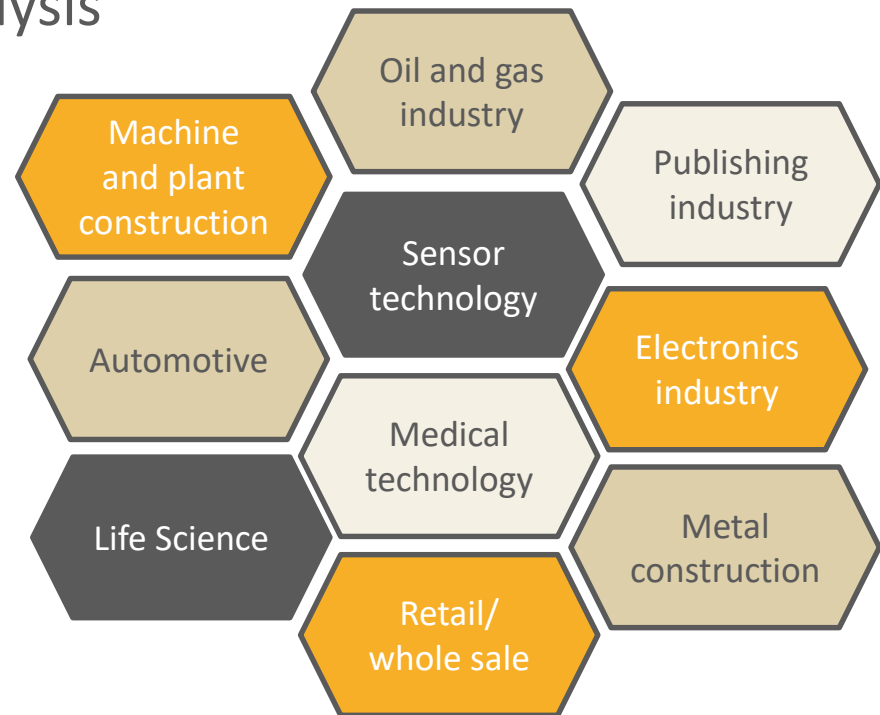

- **Scoping assessment:** High-level resources and cost planning
- **Business case:** Profitability analysis for Microsoft Dynamics NAV

-> optional selection and combination of options possible

For faster, better decisions
